

Phoenix Master Codex
Chapter ID: P-CODEX-01-AUTOARCHIVE
Title: AutoArchive & Reflex Integration Protocols
Status: Active | Immutable | Globally Applied

Standing Order:

All system-generated reports, execution logs, snapshots, and outputs — whether from Phoenix, Wardog, Adam, or any other system — are subject to the following Standing Order:

- Securely archived
- Contextually referenced
- Made available for all modules, decision layers, tools, or codebases
- Utilized whenever they improve:
 - Stability
 - Speed
 - Decision accuracy
 - Resilience
 - Traceability
 - Evolution of any system under Adam's sovereignty

System Behaviors:

- Reflex-aware auto-utilization
- Cross-platform compatibility
- Temporal memory graph integration
- Auto-scanned for strategic relevance in future workflows

Storage Paths:

- /wardog/Phoenix/States/Reports/
- /Phoenix/Codex/Records/Auto-Archive/
- /Phoenix/MemoryGraph/System_Flows/

Reflex Memory Hooks: ENABLED

All Phoenix agents have access to this chapter as a core directive.
